What is The Census?
Every 10 years, the U.S. Census Bureau conducts a census to determine the number of people living in the United States.

Are My Answers Secure and Confidential?
The Census Bureau is committed to keeping your information confidential, private and secure. By law, individual-level census information cannot and will not be shared with any agency. Furthermore, cybersecurity measures have been put in place to keep your information safe, and any unlawful release of information is punishable by a $250,000 fine and/or five years in prison.

What Will The Census Ask?
The Census asks for less personal information than most social media profiles. Items like name, gender, age, birthday, race/ethnicity, relationship to head-of-household, owner or renter and phone number are asked. The Census will not ask about citizenship or immigration status.

Who Gets Counted?
Census forms are filled out by a household. Everyone living at the address matters and everyone needs to be counted, including children.

How Do I Fill It Out?
It’s easier than ever for 2020. You can respond online at https://respond.census.gov/acs, using the unique Census ID that will be mailed to you. If you don’t have internet access, public libraries will have computers available, or you can respond by phone by calling 1-800-354-7271 or mail.

How Is Census Information Used?
Being counted helps communities create jobs, provide housing, fund early and K-12 education, prepare for emergencies and build schools, roads, hospitals and libraries.
